

**AMENDMENTS TO THE SPECIFICATION**

**Please replace the paragraph at page 16, lines 1-5, with the following amended paragraph:**

--Alternatively, at a decision step 188, the browser module determines whether the browser element represents a request to filter information on the Web view page. If so, the browser modules sends a [[sends a]] request to the server, at a step 190, to filter the information based on a filter parameter represented by the browser element, such as a selected group.--
